Beyond Architecture: Pran Pratishta Celebrates the Spirit of Creativity and Collaboration

As part of the initiatives undertaken by the Indian Institute of Architects (IIA), PCMC Chapter, the Chairman and Principal Architect of the firm organized a unique cultural and creative gathering titled “Pran Pratishta.” Conceived as a platform for artistic expression and community engagement, the event brought together architects, students, artists, and creative professionals in an inspiring and collaborative environment.

The event celebrated the spirit of creativity through a series of interactive activities, including live sketching sessions, cultural performances, artistic demonstrations, and creative exchanges. Participants were encouraged to observe, interpret, and express their ideas through various mediums, fostering meaningful interactions between experienced professionals and emerging talent.

Designed to nurture young minds and promote creative thinking beyond the conventional boundaries of architecture, Pran Pratishta provided a space where art, culture, and design converged. The event highlighted the importance of observation, imagination, and cultural appreciation as essential components of the creative process.

Through engaging discussions and hands-on participation, attendees were able to connect with like-minded individuals, exchange perspectives, and celebrate the role of creativity in shaping communities and the built environment. The success of Pran Pratishta reflected the IIA PCMC Chapter's commitment to encouraging cultural engagement, fostering talent, and creating opportunities for meaningful dialogue within the design fraternity.

The event served as a vibrant reminder that architecture extends beyond buildings—drawing inspiration from art, culture, people, and the shared experiences that enrich our collective creative journey.
