Wakad, Pune | 2021 : A new chapter in public space design was unveiled with the inauguration of AALAP Garden in Wakad, a distinctive thematic garden that blends landscape architecture with the spirit of music and culture. Designed by Shilpi Architects and Planners for the Pimpri Chinchwad Municipal Corporation (PCMC), the garden aims to offer residents a unique recreational and cultural destination.

The inauguration ceremony was graced by Ajit Pawar, along with elected representatives, municipal officials, artists, and local citizens, marking the opening of a landmark public space envisioned to enrich the urban experience of Wakad.

Conceptualized around the theme of music, AALAP Garden draws inspiration from the classical Indian musical term "Alap," which signifies the introductory and exploratory phase of a melody. Reflecting this essence, the garden incorporates artistic installations, thematic landscape elements, interactive features, pedestrian pathways, and gathering spaces designed to evoke rhythm, harmony, and creative expression.

The project seeks to create an immersive environment where visitors can engage with nature while experiencing the cultural significance of music in an open and accessible setting. Through its thoughtfully designed spaces, the garden encourages recreation, social interaction, and artistic appreciation among people of all age groups.

Speaking on the significance of the project, representatives associated with the development highlighted that AALAP Garden represents an innovative approach to contemporary place-making. By integrating cultural narratives into public landscapes, the project demonstrates how thematic design can strengthen the identity of urban spaces and create memorable experiences for communities.

As one of Wakad's newest public attractions, AALAP Garden stands as a symbol of creativity, culture, and community engagement. The project reflects the shared vision of PCMC and Shilpi Architects and Planners to develop meaningful public environments that go beyond conventional recreation and contribute to the cultural vibrancy of the city.
