School Building for corporation

Walhekarwadi, PCMC, India.

Use – School building

Typology – Institutional

Size M2/Ft2 – 5040 / 54,251

Status - Completed

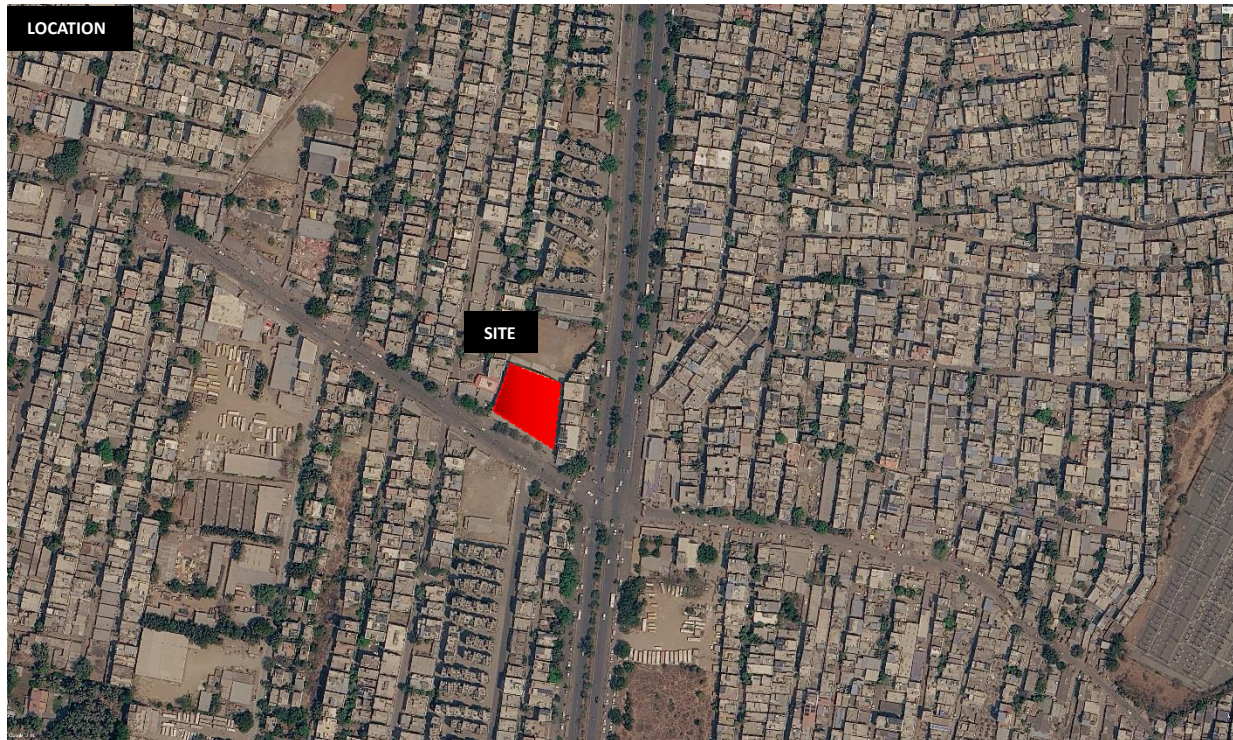

Nurturing Young Minds through Vibrant Learning Spaces

Introduction

Located in Walhekarwadi, PCMC, Pune, this educational institution has been envisioned as a dynamic and engaging environment that supports holistic learning and development. The design moves beyond conventional school architecture by introducing a vibrant facade characterized by colorful bands that create a distinctive identity while fostering a sense of creativity, inclusiveness, and curiosity among students.

The school has been planned in accordance with institutional planning norms, ensuring well-proportioned classrooms, adequate circulation spaces, and a safe, accessible environment for students and staff. Special attention has been given to providing essential facilities including sanitation infrastructure, drinking water provisions, administrative areas, and dedicated spaces for extracurricular and recreational activities.

Architecture & Facade

The facade serves as more than an aesthetic element; it symbolizes diversity, imagination, and the vibrant energy of childhood. The rhythmic arrangement of colors breaks down the scale of the building and creates a playful architectural expression that resonates with young learners. This design language continues into the interiors, where carefully integrated color accents enliven otherwise simple white spaces, creating engaging classrooms and interactive learning environments.

Concluding Para

More than a place of education, the project creates an environment that encourages participation, exploration, and holistic development. Through its vibrant architectural character and child-centric planning approach, the school contributes positively to the educational and social fabric of the community, fostering an inspiring setting where young minds can learn, grow, and thrive.
